

Alessandro Scarimbolo

Computer Engineering & Automation | Junior IT Project Manager | SAP HANA Project Support

PROFESSIONAL SUMMARY

Computer Engineering and Automation graduate and current AI Master's student with full-stack development experience across databases, web applications, server/NAS infrastructure and IoT security. Brings 4+ years in safety-critical rail operations, handling incidents, passenger communication and operational continuity. Strong fit for SAP HANA project support through stakeholder communication, risk/issue management, requirements translation, QA mindset and calm execution under pressure.

CORE SKILLS

Project & Delivery

IT Project Coordination Stakeholder Communication Risk & Issue Management Operational Problem Solving
Incident Management Team Coordination Planning & Organization Process Improvement Quality Assurance

Technical

SQL & Databases Oracle PostgreSQL MongoDB Firebase React Angular Node.js Java C#
JavaScript HTML5 CSS/Tailwind

Tools & Languages

Microsoft Excel Microsoft PowerPoint Microsoft Word Google Drive Italian - Native English - B2

WORK EXPERIENCE

Train Manager / Capotreno

Trenitalia Spa

📅 12/2022 - Present

📍 Bari, Italy

- Coordinated daily on-board operations, ensuring passenger safety, service continuity and compliance with railway procedures.
- Managed real-time service disruptions, passenger assistance requests and operational issues in a high-pressure public transport environment.
- Communicated clearly with passengers, operational teams and railway staff to reduce escalation risk and maintain service efficiency.
- Resolved unexpected events under time constraints, prioritizing safety, customer satisfaction and operational continuity.

Junior Developer

Fincons Spa

📅 10/2021 - 02/2022

📍 Bari, Italy

- Developed full-stack web application components across frontend and backend using React, Angular, Node.js/Express, JavaScript, HTML5, CSS/Tailwind, Java, C# and C++.
- Worked with relational and NoSQL databases including Oracle, PostgreSQL and MongoDB to support structured data management.
- Translated technical requirements into functional software components, improving alignment between delivery tasks and project objectives.
- Collaborated with developers and technical stakeholders during a 4-month professional software development experience.

Administrative and Data Management Apprentice

MAS Srlsu

📅 08/2020 - 10/2021

📍 Bari, Italy

- Managed invoice entry and structured condominium-related data across internal administrative databases.
- Organized business information to improve data accuracy, document retrieval and administrative efficiency.
- Maintained database records and internal documentation, strengthening attention to detail and data governance discipline.

WORK EXPERIENCE

IT Apprentice

One-Tec ASBL

11/2019 - 12/2019

Brussels, Belgium

- Performed server maintenance and basic troubleshooting to ensure optimal system performance and availability.
- Assisted in the setup and configuration of NAS devices for data storage and backup.
- Supported the deployment and testing of a prototype IoT security system for access control and monitoring.
- Gained hands-on exposure to IT infrastructure, networking and cybersecurity best practices.

EDUCATION

MSc in Computer Engineering and Automation - Artificial Intelligence Curriculum

eCampus University

02/2026 - Present

Bari, Italy

BSc in Computer Engineering and Automation

eCampus University

Comprehensive program covering computer engineering, automation, software development, databases, networks and control systems.

Scientific High School Diploma - Applied Sciences

Liceo Scientifico Scienze Applicate Margherita Hack

09/2015 - 07/2020

Bari, Italy

Final grade: 100/100

SELECTED PROJECTS

IoT Predictive Maintenance System for Industrial Equipment

IoT ESP32 MEMS Sensors ThingsBoard Predictive Maintenance

Designed an IoT-based predictive maintenance concept for industrial equipment, focused on vibration monitoring, dashboards and data-driven maintenance decisions.

Dynamic Website and CMS for Accounting Firm

Web Development CMS Responsive Design SEO Client Requirements

Delivered a responsive business website and CMS structure, improving content organization, online visibility and client-oriented information architecture.

VOLUNTEER EXPERIENCE

Scout Leader / Caposcout - AGESCI / Scout Group Bari 14

09/2020 - Present

Bari, Italy
